

How to Install Canvas 7.x

Important Before you begin:

- a) You must be logged onto the workstation as the user.
- b) Have been granted access to the software service.
- c) Running a client copy of KeyAccess.

Windows 2K/XP

1. Click on START Button and select RUN
2. In the Open box type <\\ppdserver\pcapps\Canvas7.x\install.bat>
3. In the DOS window, in answer to the question, type D (for Directory) and hit return.
4. After Canvas 7 has loaded, the MS-DOS box can be closed.
5. Canvas 7 is now installed. Use the icon on the desktop or in the Start menu to launch Canvas 7.

Side note:

The install utility updates your Registry to fix some installation issues. If you are prompted to update your registry, then click “Yes”.
